Designing for
Accessibility and Safety

## Changing Patient and Healthcare Demographics

There are a number of factors that led MTI to design ADA Compliant accessibility and safety standards into its newest products. Amongst those are the high percentage of people with mobility disabilities, the obesity percentage among U.S. adults, the average age of patients continuing to rise, and the high percentage of healthcare worker injuries.

MTI's ADA Compliant accessible chairs and tables can help reduce patient and healthcare worker injury and distress to achieve a true patient and healthcare worker centered design. They also help reduce liability issues and increase patient satisfaction and employee retention using the newest technology and quality standards.

MTI's ADA Compliant chairs and tables meet the **17"–19" entry height** and all other ADA requirements.
18.75"
The Americans with Disabilities Act of 1990

The Americans with Disabilities Act of 1990 (ADA) and Section 504 of the Rehabilitation Act of 1973 are federal civil rights laws that prohibit discrimination against individuals with disabilities in every-day activities. In 2010, Section 510 was added to the Rehabilitation Act of 1973 that requires the Access Board to issue standards for medical, dental and ophthalmic diagnostic equipment to ensure such equipment is accessible to, and usable by, individuals with disabilities.4

In 2017, the U.S. Access Board added part 1195 to title 36 of the Code of Federal Regulations as a published document in the Federal Register to meet the requirements of Section 510 of the Rehabilitation Act of 1973 for an ADA Compliant chair and table4. Two of the key components to this regulation are the entry height of 17"-19" and a patient transfer support, with which MTI's ADA Compliant chairs and tables comply.

Transfer *Supports*

MTI's Transfer Support is ambidextrous, rotates 180 degrees, and meets all ADA requirements.

TM

The MTI 550 Podiatry & Wound Care Chair in any base version (standard, swivel or mobile) is ADA Compliant. Meeting all ADA requirements, the 550 Chair provides easy patient ingress/egress and equal access for patients and caregivers with disabilities.

All 550 Chairs come equipped with SmartTech™.

SmartTech™ is the combination of MTI's Smart Controller™ and Smart Safety™ technology using a centralized computer controller that enhances safety, reduces energy consumption, and provides smoother movement, additional memory options, and more user preferences.

[6] Varies by base style

Ultra quiet DC motors are 30% faster and at 725 lb rating, the 550 Chair has an unmatch patient rating capacity.

Foot control with sealed membrane for easy cleaning and disinfecting.

The soft and sleek design defines luxury and provides superior patient access.

ADA Compliant 18.75" entry height with 7" automatic power footrest extension and extend/retract buttons for independent movements.

Base Options

Choose one of three ADA Compliant bases. (shown with optional oval headrest)
The Swivel Base's Safe Swivel™ lock can be set to a Lock/Unlock or Auto-Lock setting. For safety, the swivel auto-locks during unsafe movements. While swiveling the chair, the power and foot control cords do not swivel with the chair.
